The Critical Environment Management Revolution - U-level Asset Manager Enhance Audit Efficiency by 1,000+ Times

Whether your company is managing your on-premises data center or collocating assets in a third-party data center, an overall inventory or asset manager is one of the crucial elements of data center operations.

iNAV's U-level Asset Manager combines U-level module and U-level tag, enables the flow of asset movement to provide accurate, auditable and most up-to-date inventory of all IT assets and their physical location, down to the U-Level.
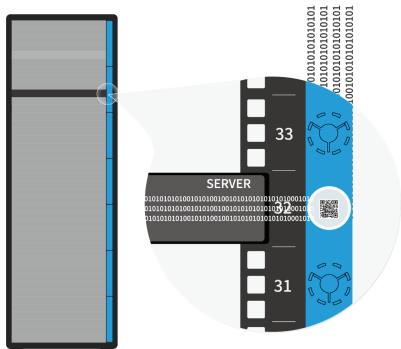

Keep track of your critical equipment!

▶ Batteryless active RFID technology
▶ Unique QR code
▶ Cascaded modular design
▶ Multi-colored LED lights
▶ Removable magnetic connection

U-level tag

What makes U-level Asset Manager stands out

▶ Highly visible with all IT assets from servers to storage networking equipment
▶ Real-time online inventory stock-taking with industry-leading RFID technology
▶ Quickly locates server details, network, asset reserved space, and power consumption for IT assets
▶ Simplifies online inventory stock-taking and unauthorized changes monitoring
▶ Fully compatible with iNAV DCIM, increase RU utilization rate by 10-20%
